PREFATORY NOTE

THIS seventy-second yearly issue of the English Catalogue of Books comprises the titles (in duplicate—namely, under author, and subject or title) of works published during 1908, and also of some received too late for inclusion in the seventy-first issue.

The main entry of each book begins with the author's surname (if known) in **heavy type**. As an index to these "Author" records, entries are also made under the titles, commencing with its most important word (which usually indicates the *subject* dealt with by each book), or with the first word; the word or name under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the fullest information about a book may be found. Main entries and index are in one alphabet.

To increase the usefulness of the Catalogue as a work of reference, the practice has been adopted this year of giving in full the fore-names of authors, instead of simply the initials as previously.

The publications of Learned Societies are recorded in an Appendix.

The names and addresses of the publishers of Great Britain and Ireland will be found at the end of the volume, followed by those of the principal publishers in the United States and in Canada. The telegraph and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of this year, showing in detail the number of works in each class of literature, and giving the proportions of new books and new editions.

Hearty thanks are due to many publishers, secretaries, authors, and bibliographers who have assisted in making this book more correct and comprehensive than it otherwise would have been.

The Editor will be glad to have particulars of author, price, publisher, and month of publication of any work which may have been omitted. Information as to each book should be given on a *separate* slip of paper or postcard. It should be addressed to—

ANALYSIS OF THE BOOKS OF 1908.

LIKE most businesses, publishing has suffered a slight depression during the year 1908, although it is still well above any year previous to 1907. As will be seen in the following table, the total

number of books recorded as published in 1908 is 9,821, a decrease of 93 as compared with 1907, but still more than 1,200 above any previous year.

This decrease is inconsiderable, but on analysing the figures it will be seen that there has also been a slight fall in the average class of book published. Thus in New Books (as opposed to New Editions) there has been a decrease of 189 during the year, while there has been an increase of 96 in New Editions. That is to say, a greater proportion of cheap reprints have appeared, the actual percentage of these for 1907 and 1908 being 22.3 and 23.5 respectively. This has been the case especially in Fiction, Religion and Philosophy, and Political and Social Economy; and an example is afforded by the Fiction

published during July, when 177 books were issued, of which 88 or practically 50 per cent. were New Editions.

Taking the year's output class by class there are the following decreases: Religion, 28; Educational, 60; Political and Social, 92; History, 13; Year Books, 24; Medicine, 32; and Belles Lettres, 79; while there are *increases* in the following classes: Fiction, 5; Law, 17; Arts and Sciences, 55; Voyages, 49; Poetry, 42; and Miscellaneous 67. Other detailed information is supplied by the Analytical Table.

Keep in Touch with the Trade

By Advertising in "The Publishers' Circular."

"The Publishers' Circular" is read by booksellers' librarians, and all connected with books and literature at home and abroad. It possesses certain features which make it indispensable, and there is hardly a bookseller in the country who does not read and study every number.

The up-to-date Trade information; the List of Books Wanted; and the detailed particulars of New Publications are some of the weekly features which ensure its being bought and read by booksellers, librarians, and large bookbuyers generally.

"The Publishers' Circular" is therefore an excellent medium for Publishers' Announcements. An advertisement in its pages is the most effective and economical means of reaching the men whose business it is to buy books, and who respond to book advertising more than any other class.

Booksellers having rare or second-hand books for disposal should try the effect of an advertisement in "The Publishers' Circular." We are every day receiving fresh testimony as to the efficacy of our advertising columns in this respect.

DIRECTORY OF PUBLISHERS.

Publishers have been invited to send us their Telegraphic Addresses and Telephone Numbers.

*Those sent will be found below between square brackets [], and separated from each other by a semicolon (;).
The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.*

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the 1908 English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptance of the term, be called Publishers, since the publication of books forms only an occasional portion of their business.
